

VHP Resistance Certificate

(VHP – Vapour Hydrogen Peroxide)

This certificate was issued on the basis of a protocol from 20th October 2023 describing the VHP (Vapour Hydrogen Peroxide) resistance results of selected components supplied by Köttermann GmbH.

The VHP testing was conducted in five consecutive cycles under the following conditions:

- Exposure time: 30 minutes
- Average H₂O₂ concentration: 700 ppm
- Temperature range: 22-29°C
- Average relative humidity (Rh): 60%

Block Technology a.s. hereby confirms that all components supplied by Köttermann GmbH have passed the VHP resistance test without any change according to visual inspection – i.e. no damage to the inspected surfaces was identified.
